

## University of Miyazaki Summer Program 2019

### **Summer course**

“Learn about Japan and Miyazaki and University of Miyazaki”

We will give you 5 classes in this summer program as follows.

(Japanese language, Japanese language practice, Japanese culture, Laboratory research, and Training program on the conservation, management and use of genetic resources)

1. Japanese language,

In accordance with participants' Japanese level, participants will be divided into 3 classes to learn Japanese. Beginner classes can learn Japanese in English.

2. Japanese language practice,

Participants will practice Japanese by attending in Japanese student classes and communicating with local people.

3. Japanese culture:

Participants can choose English class or Japanese class. It is a class to understand Japan through traditional Japanese cultural experiences such as tea ceremony, observation of ruins and weekend farm stay etc.

4. Laboratory research:

The laboratory research class is designed for undergraduate students who wish to progress to postgraduate level. In lab, English will be the main language of instruction. It will take the form of lectures in small student groups delivered by relevant experts from the university's academic staff. The topics addressed will be customized in accordance with the applicants' research interests. For details of research topics, please visit the UOM website. If less than quota, class may not to be offered.

5. Training program on the conservation, management and use of genetic resources:

In this course, we provide opportunities for learning about conservation, management and use of genetic resources through lectures and practical exercises as follows; Practice and method of model genetic resources (laboratory works, 90 hours). We conduct this course in English.

This program is intended for master course students who may have basic knowledge of biology, molecular biology and genetics.

### **Course Components and Credits**

1. Japanese language (total of 15 times; 1 credit):

Basic Japanese I (Beginner - Elementary Level)

Basic Japanese II (Elementary - Intermediate Level)

Basic Japanese III (Intermediate-Advanced Level)

2. Japanese language practice (total of 15 times; 1 credit)

Japanese culture J (main language: Japanese)

Japanese culture E (main language: English)

4. Laboratory research (approx. 30 hours: 1 credit):  
Medicine  
Engineering  
Agriculture
5. Training program on the conservation, management and use of genetic resources  
Practice and method of model genetic resources 90 hours  
Notice: The University doesn't approve any credits, but we issue a certificate of attending this program.

### **Program Courses**

- Course A:
  - Japanese language, Japanese culture and Laboratory research
- Course B:
  - Japanese language, Japanese practice, and Japanese culture
- Course C:
  - Japanese culture and Laboratory research
- Course D:
  - Japanese language, Japanese culture and Training program on the conservation, management and use of genetic resources
- Course E:
  - Japanese culture and Training program on the conservation, management and use of genetic resources

科目	選択コース	A	B	C	D	E
1. Japanese language		○	○		○	
2. Japanese practice			○			
3. Japanese culture		○	○	○	○	○
4. Laboratory research		○		○		
5. Training program on the conservation, management and use of genetic resources					○	○

### **Program Schedule 2019**

If you choose Course A, B or C:

Jul 6-7	Arrive in Miyazaki
Jul 8	Opening Ceremony and Orientation
Jul 9 – Jul 29	Summer Courses
Jul 12,19,27	Field Trips and Activities
Jul 13 – Jul 14	Farm-stay
Jul 29	Closing Ceremony
Jul 30	leaving Miyazaki

If you choose Course D or E:

Jul 6-7	Arrive in Miyazaki
Jul 8	Opening Ceremony and Orientation
Jul 9 – Aug 6	Summer Courses

Jul 12,19,27	Field Trips and Activities
Jul 13 – Jul 14	Farm-stay
Aug 6	Closing Ceremony
Aug 7	leaving Miyazaki

### **Availability**

30 students (There will be a selection process if applicants are oversubscribe.)

### **Conditions**

#### Common to all courses

Status : Person undergraduate or graduate students enrolled in university.

Language skill : Person should be enrolled in an university and have an ability to communicate in Japanese or English. (Over 500 points on TOEFL or passed Grade 3 or higher on JLPT) . If we cannot determine with your documents, we may decline your acceptance.

Health condition : Person who is judged by a doctor that being physically and mentally healthy enough to participate in this program with a defined medical certificate.

#### Subject: Course A, C, D, E

In principle applicants for Laboratory Research Class should have a current academic record (within the past one) equivalent to GPA 2.5 or above and a minimum TOEFL score of 500 (with the exception of native English speakers, applicants registered at universities in English speaking countries and applicants for the Japanese Language Class.)

### **Fee**

- Course A: 130,000 yen
  - (3 credits; Japanese language, Japanese culture and Laboratory research)
- Course B: 130,000 yen
  - (3 credits; Japanese language, Japanese language practice, and Japanese culture)
- Course C: 120,000 yen
  - (2 credits; Japanese culture and Laboratory research)
- Course D: 140,000 yen
  - (2 credits; Japanese language, Japanese culture and Training program on the conservation, management and use of genetic resources)
- Course E: 130,000 yen
  - (1 credit; Japanese culture and Training program on the conservation, management and use of genetic resources)

\* Full payment in cash to be made on arrival (payment by credit card is under consideration and we will inform you later whether it is impossible or not).

\* The above fee doesn't cover meal expenses and daily transportation.

### **Accommodation**
